Goal

My professional goals are to find work at a company where my skills would come to good use and where I can develop both my programming tools and my soft skills.
New technology has always excited me and to work at a company that is passionate about introducing new tech and to there have a meaningful role is something that I will be striving for.
Working at Ericsson this past year has given me really good practice in working on developing software as a team in project groups and that is something that I would like to keep doing.
I would also love to work internationally for a couple of years and try to soak up as much knowledge as possible from people of different backgrounds and cultures.

Employments

Jun 2008 – Sept 2008 **Textil storage assistant/manager, Berendsen AB, Ockelbo**
Worked att Berendsen AB for one summer and was the sole summer intern who got to work at their textil storage at Gävle hospital. The regular employee went on vacation after two weeks and I was then left in charge of the storage.

Jul 2009 – Sept 2009 **Salesman at the computer department, Media Markt, Valbo**
I was one of the 120 individuals who got employment out of 6000 applicants when Media Markt opened their department store in Valbo. I got a salesman education and got to experience the process of opening a new store.

Sept 2009 – Jan 2010 **Salesman at the Hifi department, Media Markt, Valbo**
After my employment period at the computer department ran out I wanted to continue my career as a technology salesman and applied for a job at the Hifi department.

May 2010 – Sept 2010 **Salesman, Onoff, Valbo**
My employment at OnOff gave me a new perspective on the home electronic business and they had a clearer focus on the sales figures, which motivated me as a competitive person. The store was much smaller so I also got a chance to sell products from every product category.

Nov 2010 - May 2012 **Salesman, Siba, Valbo**
Me and a fellow colleague was responsible for the computer department For a period of a couple of months I was the second best seller of credit in Sweden in the company.

Jun 2014 - Present **Software Developer, Ericsson, Kista**
I have been working with Finn Magnusson on developing a command-line interface for RBS-communication using the NETCONF protocol. I was employed as a summer intern last summer and have since then worked on the project in parallel to my studies in Linköping.

Education

Aug 2005 – Jun 2008   **Social Science program with focus on sports, Borgarskolan, Gävle**

Feb 2009 – May 2009   **Mathematics C, Gävle Komvux**

Aug 2012 – Jun 2013   **Studies in Natural Sciences, Gävle University**

Aug 2013 – Jun 2018   **Master of Science in Computer Science, Linköping University**

Sept 2015 – Sept 2016 **Bachelor's studies in Computer Science, Eidgenössische Technische Hochschule Zürich (ETH), Switzerland**

Other Responsibilities

Aug 2006 – Jun 2008   **Youth athletics coach, Ockelbo Basketklubb, Ockelbo**

Language skills

- Swedish - Native
- English – Fluent in text and speech
- Spanish – Basic understanding

Computer skills

I have knowledge of the computers hardware and how the components work together. I used to build computers at home when I was younger and was in charge of building the custom built desktops we used as multimedia computers at Media Markt when I was employed at the Computer department.

On the software side I have more extensive familiarity with Java, C++, C, Python and Swift, and have been introduced to Haskell, SQL and Ada. The project I am working on at Ericsson at the moment is written in Java and as I have also worked on some side projects in that language previously I would have to say that it is the language that I have had most practice in.

I love to expand my tool box and I'm regularly trying out ideas in personal projects on the side of my studies. In the past year I set a goal to learn mobile development for the iOS platform and after several minor projects I now feel like I've got a good feel for the Swift programming language.

I've also been interested in learning web development for a long while and recently decided to build a personal website which will function as a dynamic resumé. The process has led to me learning HTML, CSS and some jQuery and Javascript.
